

# GEOMATICS SURVEY TEAM MAPPING TRACK TOPOGRAPHY

By Kyle Cook

A three-man crew of surveying students from the Oregon Institute of Technology's Geomatics department is mapping the topography of the field at John F. Moehlthe OIT Athletic Department the field as part of a proposed p

provided by the Online Positioning User Service (OPUS) regulated by the National Oceanic and Atmospheric Association (NOAA).

For the students performing the survey, the project represents a culmination of the many skills learned during the surveying education; drafting skills and the fieldwork were a central part of the classes that provided the background for the work performed. "Without the hands experience we gained at school, this project would have been above our abilities." By,
